CIT.Q135

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

IN RE APPLICATION OF:
SCHERER

SERIAL NO. : 10/044,502

FILED: JAN. 10, 2002

FOR: A COMPACT ELECTRICALLY
AND OPTICALLY PUMPED MULTI-
WAVELENGTH NANOCAVITY
LASER, MODULATOR AND
DETECTOR ARRAYS AND METHOD
OF MAKING THE SAME

Examiner: H.T. Vy

Group Art Unit: 2828

APR 20 2004 5:00 PM '04

RECORDED IN THE **INTERVIEW RECORD** ON APRIL 20, 2004.

Hon. Commissioner of Patents and Trademarks
Washington DC 20231

Sir:

In reply to the Advisory Action mailed Dec. 23, 2003, please note the following record of interview of Dec. 11, 2003 from applicant.

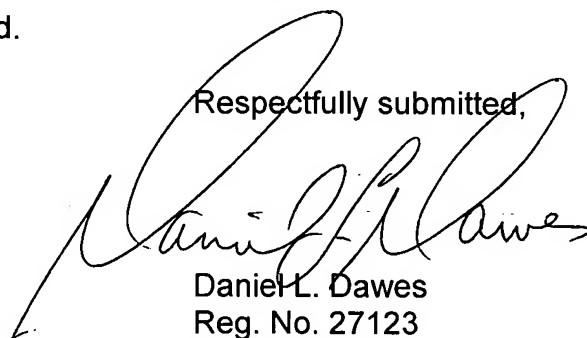

1. There were no exhibits or demonstrations.
2. Claim 1 was discussed.
3. The reference Painter was discussed.
4. The Examiner suggested inclusion in the preamble of claim 1 information taken from U.S. Patent 6,466,709. Applicants suggested that the claims be directed to an improvement in a photonic device.

5. The notion of a plurality of cavities or defects themselves forming an array, which cavities or defects are defined in the array of holes forming a photonic crystal, was discussed. Wording directed to this notion in the original and amended claims under the Amendment After Final was discussed. The Examiner contended that a "patterned array of nanocavities" meant any collection or arrangement of defects in a photonic crystal, including random distributions of defects. The applicants argued that a "patterned array of nanocavities" would be understood to mean some type of repeated or periodic pattern of nanocavities.

6. No other matters of substance were discussed.

7. No agreement was reached.

Respectfully submitted,
